Objective

Enthusiastic and detail-oriented BCA student (Final Year, 2026) with strong foundations in full-stack web development, programming, and database management. Passionate about building scalable, real-world applications and solving complex problems through clean, efficient code. Seeking an opportunity to contribute technical skills, learn from experienced industry professionals, and deliver high-quality software solutions that create meaningful business value.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

St. Aloysius (Autonomous) College, Mangalore
CGPA: 7.5

- Key subjects: Data Structures, DBMS, Web Technologies, OOP, Software Engineering, Computer Networks, Operating Systems.

Pre-University (CEBA)

2021 – 2023

St. Aloysius PU College, Mangalore
Passed

Projects

Project Title: Portfolio

Tech Stack: HTML, CSS, JavaScript, GitHub Pages

A personal website developed using HTML, CSS, and JavaScript to showcase skills, projects, education, and contact information in a clean, responsive layout. Features smooth navigation, mobile-friendly design, and dedicated sections for About, Skills, Projects, and Contact. Optimized for fast load times and accessibility across all devices. Hosted live at <https://vinayvk2005-commits.github.io/Portfolio/>

Project Title: Blood Donation Camp Management System

Tech Stack: PHP, MySQL, HTML, CSS, XAMPP

A full-stack web application designed to streamline blood donation camp operations. Features include donor registration, blood group tracking, camp scheduling, and a real-time admin dashboard. Built with secure user authentication, session management, and optimized CRUD operations on a MySQL backend. Designed with a clean, intuitive interface to ensure ease of use for non-technical camp volunteers and coordinators.

Project Title: Smart Nearby Places Recommender

Tech Stack: JavaScript, Geolocation API, HTML, CSS, GitHub Pages

A live web application that uses the browser's Geolocation API to detect the user's real-time location and intelligently recommend nearby places such as restaurants, hospitals, parks, and more. Provides category-based filtering and distance sorting for a smooth discovery experience. Deployed as a production-ready application on GitHub Pages — fully accessible from any modern browser with no installation required. Live at <https://vinayvk2005-commits.github.io/Live-/>

Project Title: E-Commerce Web Application

Tech Stack: PHP, MySQL, HTML, CSS

A fully functional e-commerce platform featuring product catalog management, a dynamic shopping cart, secure checkout, and a role-based admin panel for product and order management. Implements user authentication, session control, and optimized database queries. Built with a strong focus on performance, responsive UI, and cross-browser compatibility to deliver a seamless shopping experience.

Skills

- **Programming:** Java, HTML5, CSS3, JavaScript (ES6+), PHP, Basic Python, SQL and MySQL
- **Tools:** Git, GitHub, VS Code, XAMPP, Apache NetBeans, Power BI, MS Office (Word, Excel, Outlook), Google Workspace
- **Frameworks & Concepts:** REST APIs, CRUD Operations, Database Connectivity, Geolocation API, OOP, Data Structures, MVC Architecture

- **Additional Skills:** Problem Solving, Critical Thinking, Team Collaboration, Adaptability, Quick Learner, Attention to Detail

Certifications

- Web Programming for Beginners
- HTML, CSS, PHP (CRUD) — Oct 2024
- Artificial Intelligence Fundamentals with Capstone Project — IBM SkillsBuild, Aug 2025
- Data Visualization using Power BI (Workshop)

Achievements

- Independently designed, built, and deployed 4 full-stack web projects from scratch — demonstrating end-to-end product ownership as a fresher.
- Completed IBM SkillsBuild AI Fundamentals Capstone independently — showing initiative and self-driven learning beyond academic curriculum.
- Active GitHub profile with multiple publicly deployed live projects — reflecting consistent development practice and version control discipline.
- Delivered a live AI-powered location recommender app, integrating real-time Geolocation API with a production deployment on GitHub Pages.

Hobbies

- Building and deploying web applications as personal projects.
- Exploring Artificial Intelligence and Machine Learning tools and frameworks.
- Reading tech blogs and staying updated with the latest industry trends and technologies.
- Participating in online coding challenges and problem-solving exercises.
- Travelling and exploring new places.

Declaration

I hereby declare that all the information furnished above is true and correct to the best of my knowledge and belief. I am willing to learn, adapt, and contribute positively to the growth of the organization.
